Android 4.4.4 KitKat

Android 4.4.4 KitKat is the fourth major version of the Android operating system. It was released on October 15, 2013. The code name for this version is KitKat. It introduced several new features, including the ability to use USB as a mass storage device, the ability to use the camera as a scanner, and the ability to use the camera as a barcode scanner. It also introduced the new "Lollipop" design language, which was a significant departure from the previous "Ice Cream Sandwich" design. The version number 4.4.4 indicates that this is the fourth minor update to the 4.4 version of the operating system.

Android 5.0 Lollipop
